FLEXPACK 3050

PRODUCT REFERENCE

DESCRIPTION:

FLEXPACK 3050 is a high quality packing manufactured from high purity

exfoliated graphite.

COLOUR:

BLACK

SERVICE:

FLEXPACK 3050 is a soft naturally lubricious braided packing for sealing valves and pumps. The soft compressible nature of exfoliated graphite gives rise to good sealing performance at relatively low loads. FLEXPACK 3050 has excellent chemical resistance and is suitable for use in applications involving a wide range of chemical media (with the exception of strong oxidisers). The material is particularly suitable for sealing high pressure, high temperature valves in the power and petrochemical industries.

Maximum Temperature

460 degC (air)

650 degC (steam)

Maximum pressure:

180 bar

Maximum shaft speed:

20 m/s

pH:

0-14

*Not suitable for use with strong oxidising agents such as oleum, aqua regia and nitric acid.

Quality sistem accredited ISO 9001:2000
